Supplier evaluation

Dear business partners,

We have cooperated with company BOCO Pardubice machines, s.r.o. since 2007. Our cooperation has been based on renovations of wear spare parts of extrusion machines and supply of new parts, mainly plastics screws and barrels. Later, we asked the company BOCO for increasing performances on the existing extrusion machines using their programme for optimizing the extrusion in the form of geometric screw changes. We have reached increase in performances and production efficiency and life extension of screws. We work with BOCO on projects that lead to energy savings. We have been ordering extrusion machines for plastics and rubber since 2012.

List of successful projects:

Extrusion machine Bocomatic of the diameter 20 mm/24D for manufacturing TPV materials

– Delivery date 5/2012

Extrusion machine Bocomatic of the diameter 63,5mm/30D for co-extrusion of TPV-PP profiles

– Delivery date 7/2013

Extrusion machine Bocomatic of the diameter 90 mm/16D for manufacturing EPDM - 2 pieces

– Delivery date 5/2014

Extrusion machine Bocomatic of the diameter 60 mm/18D for manufacturing EPDM

– Delivery date 5/2014

Extrusion die set + 3 adapters – delivery date 5/2014

Gear extruder 75/50 with a vacuum pump – delivery date 9/2014

Extrusion machine Bocomatic of the diameter 75/30D for manufacturing EPDM

- Delivery date 10/2014

In our opinion cooperation with the company BOCO PARDUBICE machines, s.r.o. is beneficial for us and we plan joint implementation of other projects in the future.

Best regards

Alois Matúšů
