

BOCO
PARDUBICE

REFERENCE LETTER - JUTA a.s.

JUTA

English 

The companies JUTA a.s. and BOCO Pardubice have cooperated for many years. BOCO Pardubice is currently the main supplier of the screws, barrels, flat extrusion dies, spiral switchboards, etc. JUTA a.s. has verified in practice the professional approach of all employees of BOCO Pardubice when solving various issues in the field of extrusion processing of plastic materials. Great benefit within this area from BOCO Pardubice was a purchase of special software for the simulation of material behaviour in the screws and dies. This software helps JUTA a.s. to revise old screws or design new screws, dies, etc.

JUTA a.s.
Dukelská 417
544 15 Dvůr Králové nad
Labem, CZ

BOCO completed e.g.:

- Completely new or refitted extrusion parts of machines with the screw diameter 60 - 130 mm – renovation of approximately 15 lines
- BOCO supplied the extrusion part for the line for the production of geo-membranes within the width 8 000 mm, a screw was installed with diameter 250mm and discharge 2.7 t/hod.
- BOCO supplied a complete line for the production of PVC sections

BOCO also cooperates with the technicians of JUTA a.s. on the improvement of technological processes, they organize training sessions focusing on the processing parameters, and also the maintenance of the machinery.
